PeopleSoft Training

Using Fluid pages

Text Entry Fields

Text entry fields work the same in Fluid pages as they do in Classic PeopleSoft pages. Left click in the text entry field and then enter the text you want to use in that field.

A screenshot of a PeopleSoft Fluid page titled "Phone Number". The page has a "Cancel" button on the top left and a "Save" button on the top right. Below the title, there is a dropdown menu labeled "*Type" with a blue arrow icon. Below that is a checkbox labeled "Preferred". The main section contains two text entry fields: "Number" and "Extension". The "Number" field is highlighted with a red oval, and a blue callout box with the text "Text Entry field" points to it. The "Extension" field is a standard text box.
